🕒 Displaying agenda in event timezone (3:29 PM EDT)

Oral Presentations I

11:00 AM - 12:30 PM

Student Presentations

Hear talks from four early career scientists about their exciting research.

6 Subsessions

Symposium Day One Welcome

11:00 AM - 11:15 AM

Speaker: Marisa Tillery

Characterizing Host Cell Chromatin Dynamics in Response to Endemic and Pandemic Coronaviruses.

11:15 AM - 11:30 AM

Speaker: Jane Benoit

Identification and Development of Safe and Potent Senolytic Therapeutic Treatments.

11:30 AM - 11:45 AM

Speaker: Yang Yang

Exploiting Exosomes as a Strategy to Treat Neuronopathic Lysosomal Storage Disorders.

11:45 AM - 12:00 PM

Speaker: John Santelices

Role of Histone H3.3 in DNA Repair and Cancer.

12:00 PM - 12:15 PM

Speaker: Ernest Phillips

Announcements

12:15 PM - 12:30 PM

Speaker: Marisa Tillery

Highlighting and Increasing Diversity in Science

1:00 PM - 2:00 PM

Panel Discussions

Michael Bowie, PhD

Clinical Assistant Professor, Director of Community Engagement & Diversity Outreach

University of Florida

Speaker's Page

Karin Chumbimuni-Torres, PhD

Associate Professor of Chemistry

University of Central Florida

Speaker's Page

Regina Nuzzo, PhD

Stats Professor and Science Journalist

Gallaudet University

Network Tables

2:00 PM - 2:30 PM

Networking

Get to know other attendees by joining a Network Table where you will be placed in shuffling video chats of 2-4 attendees. This session combines the casual feeling of spontaneously chatting with a few interesting strangers and the heightened engagement of face-to-face connection within a virtual set...[Read More](#)

Oral Presentations II

3:15 PM - 4:30 PM

Student Presentations

Hear talks from four early career scientists about their exciting research.

5 Subsessions

Establishing the Molecular Regulation of Toroids.

3:15 PM - 3:30 PM

Speaker: Austin Worden

Onset Rapid Return to Health Therapeutics to Impact Epidemics Projected.

3:30 PM - 3:45 PM

Speaker: Juan Reza

Dissecting the Molecular Mechanisms Underlying Hypomethylation in Childhood Glioblastoma Cells for Therapeutic Purposes.

3:45 PM - 4:00 PM

Speaker: Chris Hagemeyer

Unraveling the Molecular Determinants of Keloid Formation and Variable Effects of Steroid Treatment using Patient Derived Keloid Fibroblasts.

4:00 PM - 4:15 PM

Speaker: Yuna Son

Announcements

4:15 PM - 4:30 PM

Speaker: Marisa Tillery

Oral Presentations III

11:00 AM - 12:30 PM

Student Presentations

Hear talks from four early career scientists about their exciting research.

6 Subsessions

Symposium Day Two Welcome

11:00 AM - 11:15 AM

Speaker: Marisa Tillery

AAV3-JAZ Vectors for the Potential Gene Therapy of Human Liver Cancer.

11:15 AM - 11:30 AM

Speaker: Ling Yin

Concurrent Treatment of AAV Gene Immunotherapy and PSL in MS Model Proven Effective.

11:30 AM - 11:45 AM

Speaker: Addelynn Sagadevan

Clonal Hematopoiesis Driven by Partial Loss of Dnmt3a Contributes to an Aggressive Phenotype of Colitis-Associated Colon Cancer.

11:45 AM - 12:00 PM

Speaker: Yang Feng

Microtubule-based Transport is Essential to Distribute RNA and Nascent Protein in Skeletal Muscle.

12:00 PM - 12:15 PM

Speaker: Lance Denes

Announcements

12:15 PM - 12:30 PM

Speaker: Marisa Tillery

Staying Sane: Maintaining a Healthy Work-Life Balance

1:00 PM - 2:00 PM

Panel Discussions

Kema Gadson, EdD

Assistant Dean for Student Affairs and Diversity

Florida State University

Speaker's Page

Kevin Winship

Licensed Mental Health Counselor

Florida State University Counseling Center

Speaker's Page

Mary Huff, PhD

Ambassador

Dragonfly Mental Health
